

Your future is in your hands!

Public Health Nurse

What Is Public Health?

- health protection
- disease prevention
- health promotion
- injury prevention

Why Is It for You?

- great salaries
- local jobs available
- good work schedule
- jobs for a variety of professionals

You don't have to work night shifts! Practise nursing without the crazy schedule and still earn an average of \$60 900 per year.

As a public health nurse you will:

- visit with moms and newborn babies in their homes to perform assessments
- give youth advice on healthy lifestyle choices
- provide guidance to parents of young children
- help develop concepts and strategies to promote health in the community
- give vaccines to children and adults
